OSEZ LE RECYCLÉ

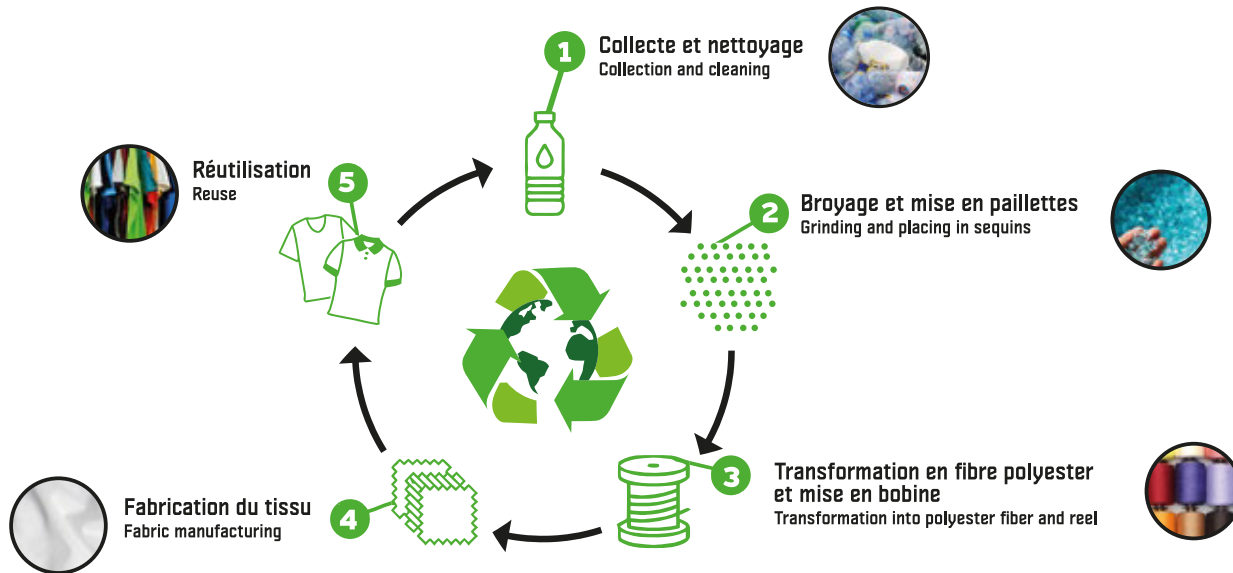

Pensez à la planète

Nous nous engageons dans l'amélioration continue des processus respectueux de l'environnement. En sélectionnant des tissus polyester provenant de filières recyclées, nous répondons, à notre niveau, aux exigences pour préserver aujourd'hui notre planète.

SPORTWEAR is committed to the continual improvement of environmentally friendly processes, which grows daily in our customers awareness. Our range of recycled Polyester fabrics, ECOREC, meets these requirements in fabrics for sportswear and outdoor enduses. We work with European yarn suppliers, that support sustainable manufacturing processes fulfilling the requirements of the European Union Environmental Laws.

TYPOLOGIE DES MATIERES

TYPOLOGY OF MATERIALS

Nos familles de matières : Interlock, Elasthanne, Structuré, Dryclim, Membrane, Chaîne et trame

INTERLOCK

Les interlock sont des tissus maille, d'aspect lisse permettant un rendu optimal de la sublimation, tout en ayant un touché soft.

Ils sont dispo en plusieurs grammages correspondant à la technicité du sport pratiqué.

MEMBRANE

Les tissus dits «membrane» sont des matériaux techniques qui agissent comme une barrière protectrice, empêchant l'eau de pénétrer tout en permettant à la vapeur d'eau de s'échapper, ce qui les rend idéaux pour des vêtements respirants et imperméables.

C'est une matière très fine et douce au toucher.

ELASTHANNE

Certains tissus utilisent et intègrent dans leur conception des fils en élasthanne, afin de conférer au tissu une certaine élasticité. Dans notre collection on trouvera des tissus allant de 4% à 30% d'élasticité.

Le fil élasthanne est lourd, donc plus le % est élevé plus le tissu aura un "meilleur tombé", et une meilleure résistance.

CHAÎNE ET TRAME

En opposition aux tissus type mailles, les chaînes et trames sont issues du tissage.

Concrètement les chaînes et trames sont des tissus sans élasticité mécanique, mais très robustes.

STRUCTURE

La matière dite structuré n'est pas lisse comme les interlock. Notre collection propose différents types de structure en plusieurs grammages.

La plus utilisé étant : le «Nid d'abeille» construite sur une base alvéolé en forme de nid d'abeille.

MICROFIBRE

La matière microfibre se compose de minuscules fibres synthétiques en forme de gouttes faites d'un mélange de polyester et de polyamide.

Domaine d'application : survêtements, serviettes, divers empiècements (short de rugby).

DRYCLIM

Grâce à sa technologie avancée, DryClim évacue rapidement l'humidité, gardant l'athlète au sec et à l'aise.

THERMOCLIM

Grâce à sa technologie de broissage, ThermoClim crée une chambre à air qui garde l'athlète au chaud et à l'aise.

DRYSTORM

Grâce à sa technologie de collage, DryStorm assure une protection maximale contre les conditions météorologiques défavorables.

ANTI-UV

Grâce à cette technologie développée à partir de tissage utilisant des fils très fins, certains tissus ont des propriétés anti UV.

TEXTILE COTON - PRESENTATION

COTON TEXTILE - PRESENTATION

LE COTON, C'EST QUOI ?

Le coton est une fibre végétale et plate qui entoure les graines de cotonniers. Reconnue pour ses nombreuses propriétés, elle est la fibre la plus utilisée au monde. Souple, douce et confortable, cette plante vivace est un vrai plaisir à porter qu'importe la saison.

POURQUOI UNE GAMME COTON ?

C'est la solution idéale pour créer votre gamme à l'image de votre club ou votre entreprise.
La gamme est 100 % coton, elle est sur mesure avec le choix de 8 couleurs.

PERSONNALISATION

5 propositions de design par produit.
Logo cœur / opposé cœur en broderie ou transfert numérique digital offert.
Autres logos sponsors en transfert numérique digital.
